Vishal Gupta

(832) – 465- 8668 @ vishal.e.gupta@gmail.com https://www.linkedin.com/in/vishalegupta/
Houston, TX

Client-facing product owner with 6+ years designing, developing, and deploying software and projects, exploring opportunities in product management and solution engineering.

SUMMARY

Product owner and manager of a real-time data application, leading cross-functional teams to conduct gap analysis, define functional requirements, plan sprints, and drive product development using agile methodology and best product management practices. A fast and eager learner, I am detail-oriented, adaptable to evolving project needs, and willing to take on diverse responsibilities to deliver high value to stakeholders. Comfortable with ambiguity, I thrive in fast-paced environments, drawing from my experience as a trusted solution architect in a startup setting.

PROFESSIONAL EXPERIENCE

EOG, Houston, TX

Product Owner / Solution Engineer 2024 - Present

EOG Resources is an industry leader in applying data-driven decision-making, automation, and predictive analytics to enhance operational efficiency in oil and gas exploration.

- Owned and developed a real-time data application aimed at identifying pipeline leaks, facility leaks, and methane emissions, reducing company costs by approximately $50 million per year, contributing to various multi-stack data ETL projects, and mathematical modeling using Jupyter Notebook, Python, and SQL.
- Led end-to-end product lifecycle for internal applications monitoring oil & gas production and facility operations, responsible for product strategy, roadmap, feature definition, execution, delivery, and development.
- Built and deployed agents for a production, facility engineering, and control room LLM application that aims to consolidate the different applications within EOG to declutter workflows and improve operational efficiency.
- Deployed and delivered a data pipeline product that improved the visibility behind leak data and generated actionable insights

HighRadius, Houston, TX

Technical Product Manager 2022 - 2024

HighRadius is a fintech enterprise commercial SaaS platform that automates accounts receivable and treasury processes with AI-based autonomous systems.

- Managed over 50 key accounts simultaneously to ensure successful value realization and optimization of HighRadius solutions.
- Defined and created a product roadmap for the development of the Credit functionality in the AR service platform

Senior Consultant 2021 – 2022

- Owned and delivered a multiple-platform SaaS solution from end to end, while collaborating with cross-functional teams and 5+ 3rd party vendors, using **REST APIs** and **Salesforce** to enhance the client's Accounts Receivable process.

Team Industrial Services, Houston, TX 2020 - 2021

Manufacturing Engineer (Manufacturing Optimization)

- Led the design and delivery of a Cost Estimation automation tool for the Critical Projects team, streamlining the bidding process for high-stakes industrial service contracts.

KEY ACHIEVEMENTS

Prevented churn of accounts, yielding $10 M ARR
Through efficient project management and teamwork, my team saved two client accounts with an annual recurring revenue totaling $10 million.

Execution Excellence Award
Placed first in a company "hackathon" aimed at full end-to-end implementation from generating a sales business case to development and change management

Co-Developer of Fridgedex
Placed in the top 10 at a University Hackathon, developing and marketing a full-stack application. Began with market research to develop KPIs and gained experience in software development.
